ABL:
May I Take Your (Reaction) Order?
Assigned activities:

1. Determine the order of the reaction
2. Determine the rate constant at a few chosen temperatures
3. Determine the activation energy of the reaction
Extra Credit
Determine the frequency factor (A)

EQUILIBRIUM

$$
\begin{aligned}
& a A+b B \rightleftarrows c C+d D \\
& R_{\text {NET }}=R_{f}-R_{r} \\
& \text { if } R_{f}=R_{r}, R_{\text {NET }}=0
\end{aligned}
$$

The Equilibrium
Constant
Assume this reaction is elementary:

$$
\begin{aligned}
& a A+b B \longrightarrow c C+d D \\
& R_{f}=K_{f}[A]^{a}[B]^{b} \\
& R_{r}=K_{r}[C]^{c}[D]^{d}
\end{aligned}
$$

At equilibrium $R f=R_{1-}$

$$
\begin{aligned}
& \frac{k_{f}[A]^{a}[B]^{b}}{k_{r}}=\frac{k_{r}[c]^{c}[D]^{d}}{k_{r}} \\
& \frac{\left(\frac{k_{f}}{k_{r}}\right)[A]^{a}[B]^{b}}{[A]^{q}[B]^{b}}=\frac{[C]^{c}[D]^{d}}{[A]^{a}[B]^{b}}
\end{aligned}
$$

Note $\frac{K_{f}}{K_{r}}=K_{c}$
Equilibuiuns
constant
constant

$$
K_{c}=\frac{\left.[C]_{\text {es }}^{c} C D\right]_{\text {er }}^{d}}{[A]_{\text {er }}^{a}[B]_{\text {en }}^{b}}
$$
